Regarding Supply Chain Disruptions for Hirose Products

Dear Valued Customers,

In February 2021, a severe winter storm triggered a massive blackout in the state of Texas (United States), and caused multiple resin suppliers to declare Force Majeure for various grades of resin. Hirose Electric has since received notice from its resin suppliers about significant supply disruptions, which are expected to continue for several months.

We will continue to monitor the situation, and are making every effort to minimize the impact of these disruption on the delivery of our certain products. Any update will be shared as soon as they become available. However, we respectfully ask for your understanding that in some cases, order confirmation and product delivery may take longer than usual.

In the event that the quantity or delivery schedule of your order is affected, a Hirose representative will contact you to provide more details.

We appreciate your kind understanding of this difficult situation, and thank you for your continued support.

Sincerely,
